ASP.NET MVC
RUBY

○ HOBBIES ○

Combat sports, boxing, MMA

👤 PROFILE

I have been a developer for over 19 years. My most recent work has involved full stack development on single page javascript applications. I have used the main javascript MV* frameworks (angular, react, emberjs) along with backbone.js.

Reactjs is my current favourite.

My company website <https://cutting.scot/> is a server rendered react website, [here](#) is the source code.

My github repos can be found [here](#) and my public development blog can be found [here](#).

[Here](#) is an example of react code I have written.

[Here](#) is an example of angular code I have written.

[Here](#) is an example of an emberjs component I wrote.

I have this [pull request](#) committed into the emberjs source code.

I've been exploring [d3.js](#) for some time and you can see some examples of more complex graphs that I have had great fun creating [here](#).

I have spoken regularly for the Glasgow [javascript users](#) group and for the Scottish developers. I have also spoken at the [DSL Devcon](#) conference at Microsoft Redmond in 2009 where I gave the [DSLs in the horn package manager](#) talk.

Before moving to Glasgow, I worked for [twentysixlondon](#) as a technical architect on the following online websites:

[The Volvo Ocean Race](#), [Waitrose](#), [Closer online](#) and [Abercrombie and Kent](#).

I originate from Belfast N.Ireland where I worked for Fujitsu on mainly government projects.

📁 EMPLOYMENT HISTORY

○ Contract Software Developer at Waracle, Glasgow, United Kingdom
